Fun Bible Facts Birds in the Bible

The Bible contains approximately three hundred references to birds, scattered from Genesis to Revelation. The Hebrew people's keen awareness of bird life is reflected in the numerous different Hebrew and Greek names used for birds in general or for specific birds. Although bird names are difficult to translate, many birds of the Bible can be identified from the descriptions of them given in the Scriptures.

Birds play a variety of roles in the Bible. Besides providing basic food needs (for example, the quails in the wilderness), birds function as messengers. Examples of this latter role include the dove and the raven in the flood story and the ravens who provided food in the Elijah narratives.
